

Uldouz Wallace Story Transcript

Hi, my name is Udo Wallace, and I was one of the victims of the iCloud hack leak in 2014. Me and 99 other women all in the public eye like Jennifer Lawrence, Kate Upton, Selena Gomez, and many others. We were all hacked and leaked by this guy that was stalking us over a 2year span. He knew everything we were doing. Watching all of our text messages, pictures, videos.

Anything that was going on he was hacking into and knew everything about our lives and, I mean, I personally was always very careful with taking pictures. You know that would be very similar to modeling bikini shoots and anything of that sort. I would make sure to cover up my private parts and you know all of that kind of stuff if I ever sent something, and if I ever was in a relationship.

But what happened was that my ex-boyfriend actually took a couple pictures and a video of me against my consent. And when we broke up 6 months later he threatened to leak these to the internet and what happened then is that I called his bluff. But even though I called his bluff, and he didn't leak it this hacker got to it and basically leaked everything to the internet. When I found out about it, is when it was leaked. Is when I found out, basically like everybody else, that oh my God the these are the same images in the video that got leaked to the internet.

What happened within this time period is so heartbreaking. When I really when I found out about what happened I just broke down and cried. I fell down to the ground, and I just couldn't go anywhere. I isolated myself for years. These were some of the best years of my life and instead of enjoying them like a normal human being I was basically like a prisoner in my own home.

I couldn't go anywhere because everybody would just talk about it. I couldn't do anything. You know I couldn't have any relationships. I lost all my friends. I lost all my family. I lost any kind of money opportunities. Any kind of opportunities to work and advance myself in life.

I lost followers, I lost everything that you could think of. It was just such hard time for me. I ended up spending over a million dollars over a three-year span just to get the content taken down on me with no success. I even learned how to do it myself. I will spend hours on hours on trying to take this stuff down just to get a notification from Google that no we didn't get some of these things taken down, or the websites would deny it and so on. I spent money on lawyers. I spent money on everything that you could think of just to get the stuff taken down with no success.

What's so hard breaking about all of this is that it's been 10 years, and nothing has been done still. Another issue is that all of these platforms they currently have the technology to block reuploads. They have the fingerprint stamp technology which scans a video or an image ahead of time and blocks it from further re-uploading. Why didn't they implement this the first time?

I begged them to take it down. Why didn't they just do that. You know I asked myself that so many times and the truth is because they're making so much money on the re-uploading. They're making so much money off of the non-consensual uploading of images and videos. The re-uploading is also a billion dollar industry, and what's even worse is that they're implementing this for movies and music but they don't want to do this for children that are begging them to take this stuff down. They're not removing anything for women and men. Anyone that's being exploited, they're not doing anything, and they have the technology. They have the technology, they have the means to do it, but they just simply choose not to because there's so much profit in it for them.

Recently Pornhub had to take down 80% of their, you know, website's content because 80% was unverified along with all of the criminal charges and so on that's been happening. I'm sure you've been updated on that this is just something that's so crazy and I've been going on and on about this for 10 years now and nothing has been done. There's still no federal laws. There's barely any laws at all to hold anyone online accountable. There's currently foreign revenge laws but for people like me there's nothing.

I'm in the public eye and what about all of the other people that have been begging these platforms to take it down. We haven't seen any success, and with the Deep fake AI content that's going on now, it's just going to be a nightmare. So I'm begging you guys to do something.

I also was a victim of deep fake AI. Not only was I hacked and leaked as a one video of me but now there's unlimited amounts of deep fake AI content on me too. On top of that I just recently did another takedown request with 3,000 more links. Just deep fake AI content.

So again, I'm begging you guys please do something now. It's time. It's gonna get even crazier than what it is now and please save anyone that's going through this so that they don't have to go, you know, through anything more or it could be stopped at least by holding online platforms accountable. Thank you.
